

World Environment Day

Date: June 5th, 2024

Venue: JSS High School , Shivarathreshwara Nagar, Bannimantap, Mysuru

On World Environment Day, students from the Department of Biotechnology and Bioinformatics at JSS Academy of Higher Education & Research (JSS AHER) participated in a tree planting event at the JSS High School campus in Bannimantap, Mysore. This initiative was aimed at promoting environmental sustainability and increasing green cover on the school campus.

The Dean Dr. Raveesha - Faculty of Life Sciences at JSS AHER actively participated in the tree planting, emphasizing the institution's commitment to environmental protection. The Department Coordinator Dr. Gopenath TS, and Dr. Ramith Ramu, the Course Coordinator of Biotechnology & Bioinformatics, also joined in the efforts, demonstrating strong leadership and support for the cause. Their involvement inspired the students and highlighted the importance of collective action in environmental conservation.

Tree Planting Activity:

The event began with students and faculty members planting several tree species around the JSS High School campus. This activity was designed to enhance the local environment and serve as a practical example of sustainable practices.

"Students unite to plant trees, fostering sustainability and greening the JSS High School campus."

The event provided an opportunity for students to apply their academic knowledge in a real-world context. It underscored the importance of trees in maintaining ecological balance, reducing carbon footprints, and enhancing biodiversity. The hands-on experience helped students understand their role in promoting environmental sustainability.

The collaborative effort between students, faculty, and the local school community fostered a sense of unity and shared responsibility. This event was a reminder of the impact that educational institutions can have on their local environments and communities.

Conclusion:

The tree planting event on World Environment Day at JSS High School, Bannimantap, Mysore, was a successful initiative that highlighted the importance of environmental stewardship. The active participation of students and faculty from the Department of Biotechnology and Bioinformatics, including the Dean, Dr. Gopenath TS, and Dr. Ramith Ramu, underscored the significance of leadership in promoting sustainable practices. The event not only contributed to the greening of the school campus but also reinforced the commitment of JSS AHER to environmental education and action. This initiative served as an inspiring example of how collective efforts can lead to meaningful environmental change.
