

Report on Workshop on Flipped Classroom – 07-06-2024

On 7th June 2024, JSS Academy of Higher Education & Research hosted an insightful session on modern teaching techniques with Dr Chaya Gopalan. The session focused on innovative strategies like Bloom's Taxonomy, Jigsaw Learning, Pikachu Learning, Jeopardy Style games, and **Flipping the Classroom**. Among these, the Flipped Classroom approach stood out for its potential to transform the traditional educational model. By delivering lectures outside the classroom through videos, it allows class time to be used for interactive activities and problem-solving, promoting active participation and deeper understanding among students.

The session was a tremendous success, offering valuable insights into modern educational strategies. The participants, including educators and students, were particularly excited about the potential of these techniques to transform traditional learning environments.

the session with Dr. Chaya Gopalan at JSS Academy of Higher Education & Research was an invaluable experience. It provided participants with practical tools and strategies to enhance teaching and learning. The insights gained will undoubtedly contribute to creating more engaging and effective educational experiences in the future.
