Hexagon – ERDAS Imagine Training Program – From 10th to 12th June - 2024

From June 10th to 12th, 2024, JSS Academy of Higher Education & Research (JSS AHER) hosted a comprehensive workshop by Mr. Shivaram Reddy from Hexagon. This workshop aimed to equip participants with theoretical knowledge and practical skills in utilizing advanced software tools provided by Hexagon. The sessions began with an introduction to Hexagon's software, covering its key features and capabilities. Participants were then guided through the software installation process, ensuring everyone could set up the tools on their systems without any issues.

A significant highlight of the workshop was the hands-on training, where participants engaged in practical exercises under the expert guidance of Mr. Shivaram Reddy. These interactive sessions allowed attendees to explore the software's functionalities in depth and apply them to simulated real-world scenarios. Each participant received a licensed version of the software, enabling them to continue exploring and practicing even after the workshop. The event was coordinated by Dr Madhu and was inaugurated by Dr Raveesha, Head of the Department, School of Life Sciences, along with Dr Prashanth Vishwanath, Dean of Research at JSS AHER.

Overall, the workshop was highly beneficial and well-received, with participants praising the practical approach and the opportunity to gain direct experience with the software. The skills and knowledge acquired during these three days will undoubtedly prove valuable in their academic and professional pursuits.
