

Report on the International Webinar:
GeoAI and WebGIS - Enhancing Spatial Intelligence
On 20.11.2025 at 10.30am

Organised by the Division of Geoinformatics
School of Life Sciences, Mysuru
JSS Academy of Higher Education and Research, Mysuru

DIVISION OF GEOINFORMATICS

SCHOOL OF LIFE SCIENCES, MYSURU
JSS ACADEMY OF HIGHER EDUCATION AND RESEARCH, MYSURU
DEEMED TO BE UNIVERSITY, ACCREDITED 'A++' BY NAAC

**INTERNATIONAL
WEBINAR ON**

**GEO-AI & WEB GIS
ENHANCING SPATIAL INTELLIGENCE**

SCAN TO REGISTER

Join this exclusive webinar to explore how GeoAI and Web GIS are revolutionizing the way we analyze, map, and interpret spatial data, uncovering smarter, faster, and more intelligent geospatial solutions for tomorrow's world.

The Division of Geoinformatics, School of Life Sciences, JSS Academy of Higher Education and Research (JSS AHER), Mysuru, organised an International Webinar on “GeoAI and Web GIS Enhancing Spatial Intelligence” as part of the International GIS Day 2025 celebration. The webinar witnessed an impressive global reach, with 185 registrations and 122 active participants from diverse academic and professional backgrounds across the world.

The event commenced with introductory remarks by Dr. Sushant Sawant Coordinator, Division of Geoinformatics, highlighting the growing significance of geospatial technologies, AI-driven analytics, and web-based GIS platforms in today's world. The purpose of the webinar was to provide participants with insights into cutting-edge developments in GeoAI and Web GIS through expert-led sessions.

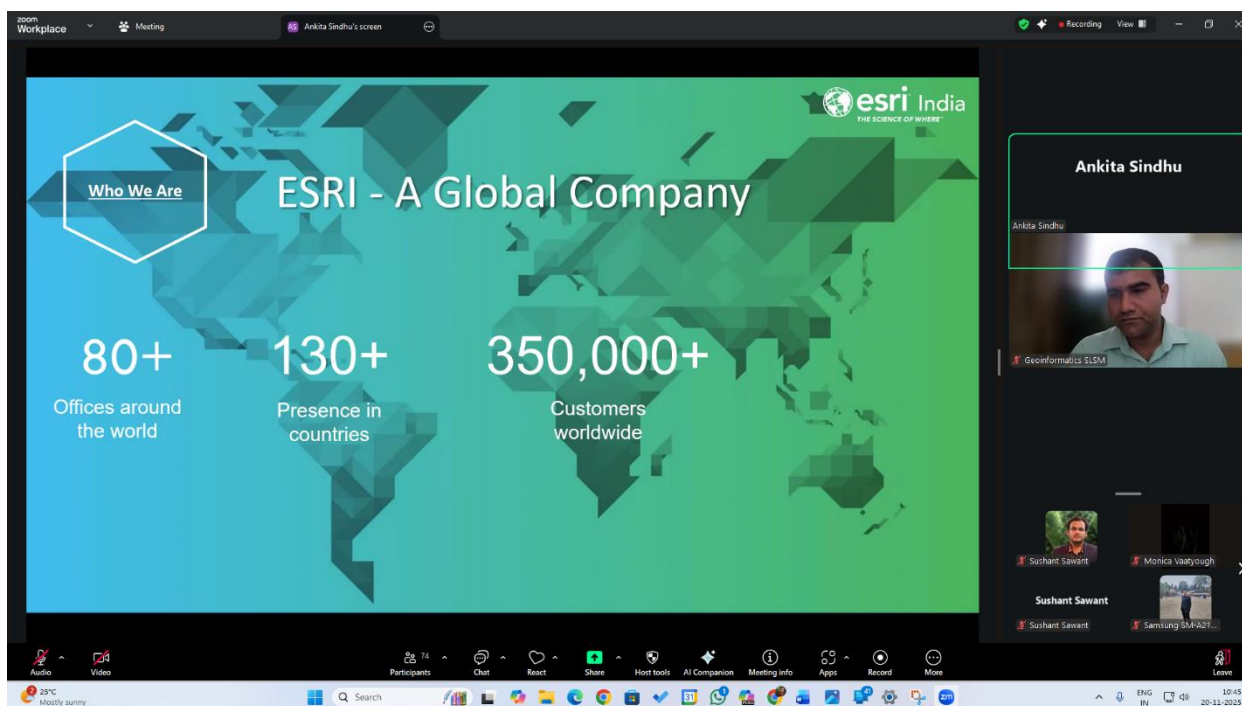

Session 1: GeoAI – Concepts, Trends & Applications

Speaker: Ms. Ankita Sindhu, Senior Pre-Sales Engineer, ESRI India

Ms. Ankita explained the foundations of GIS, the evolution of the field, and the integration of artificial intelligence into geospatial workflows. She demonstrated how GeoAI enhances image classification, object detection, predictive modelling, and geospatial automation. Participants also gained clarity on industry-driven use cases across disaster management, environmental monitoring, renewable energy, and urban planning.

The Q&A session was highly engaging, focusing on practical challenges such as integrating traffic datasets, medical GIS applications, building footprint extraction, and preparing datasets for AI modelling. Ms. Ankita also guided participants on career avenues and the importance of strong data-handling skills.

Session 2: ArcGIS for Web-Enabled GIS

Speaker: Ms. Swastika Das, Engineer, ESRI India

Ms. Swastika introduced Web GIS as a collaborative, cloud-enabled, scalable framework that supports real-time spatial intelligence. She explained the architecture of Web GIS, including web layers, cloud services, databases, and dashboards, and highlighted the growing role of Web GIS in governance, smart city planning, environmental monitoring, and emergency response.

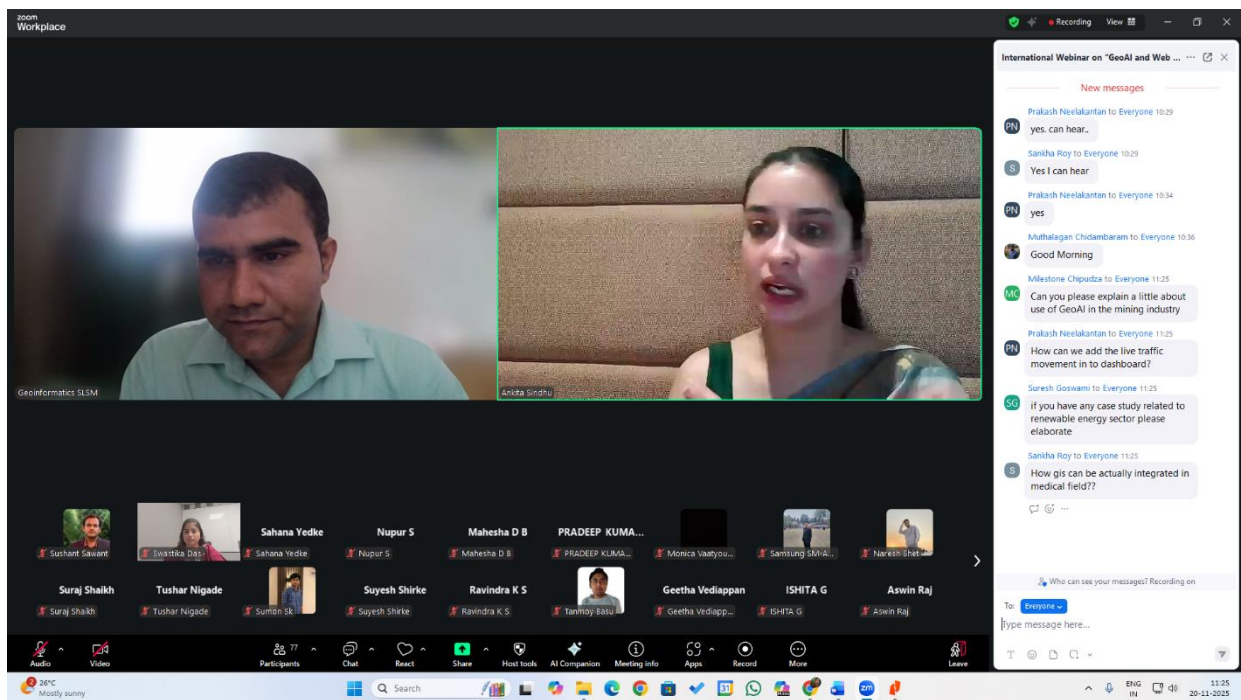

Participants appreciated the live demonstrations and the clarity with which the fundamentals were presented. During the Q&A, Ms. Swastika addressed queries on Web GIS security, its suitability for government missions, the need for organisational accounts, and best practices for managing and publishing web content. She also discussed how Web GIS is being used in various national programmes and how ESRI ensures enterprise-grade data protection.

Participant Feedback

The International Webinar on “**Geo-AI & Web GIS – Enhancing Spatial Intelligence**” received highly positive feedback from participants, reflecting strong satisfaction with both sessions and the overall event management.

Overall Experience & Organization

Participants rated the webinar very favorably, with the majority marking it **Excellent, Very Good, or Good**, and none rating it fair or poor. The organization and coordination of the event were appreciated, with most attendees reporting that the flow, communication, and facilitation were **very satisfactory**. The duration was considered appropriate by a large majority, although a few suggested allowing slightly more time for live demonstrations.

Session 1: Geo-AI & Applications

The Geo-AI session received exceptionally positive feedback. All participants found the concepts **clear or very clear**, demonstrating strong delivery effectiveness. Examples shared during the session were rated as **highly relevant or relevant**, with participants highlighting takeaways such as applications of AI in GIS and Remote Sensing, automation using AI models, improved understanding of predictive analytics, and increased motivation to apply Geo-AI techniques in research and professional workflows.

Session 2: Web GIS

The Web GIS session was similarly well received, with all participants rating the fundamentals as **well or very well explained**. Attendees found the session highly useful for academic and professional purposes, gaining insights into Web GIS workflows, publishing and sharing applications, cloud-based GIS benefits, and collaborative mapping.

Suggestions & Additional Comments

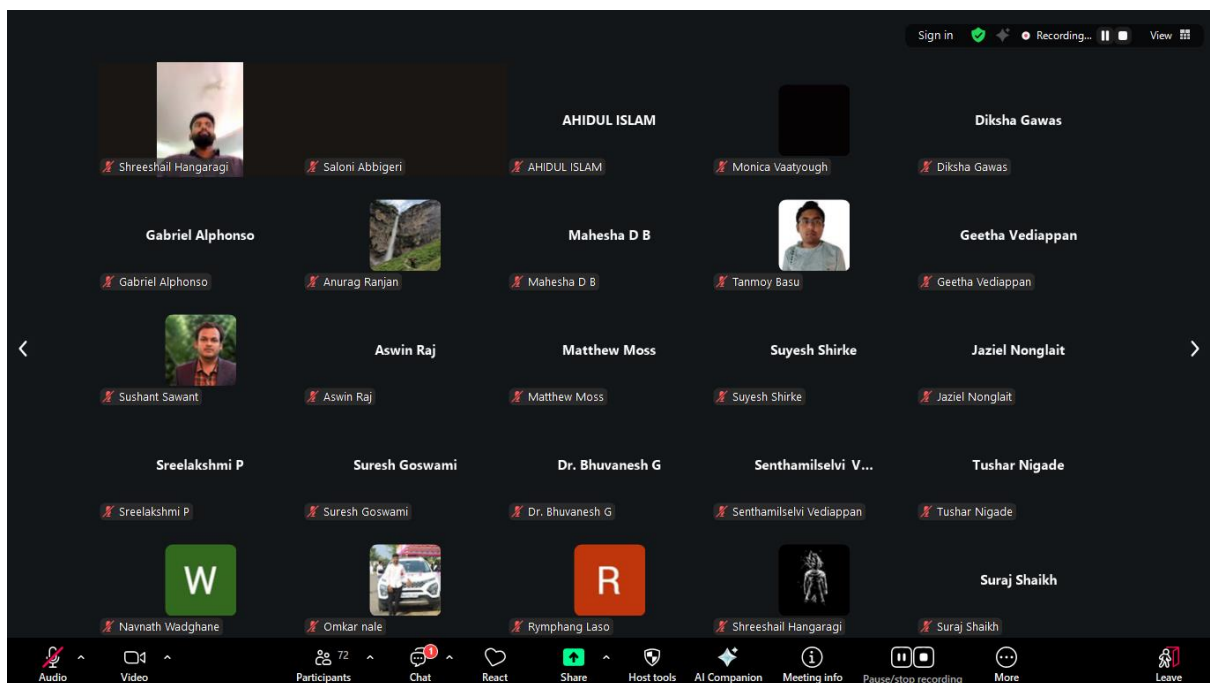

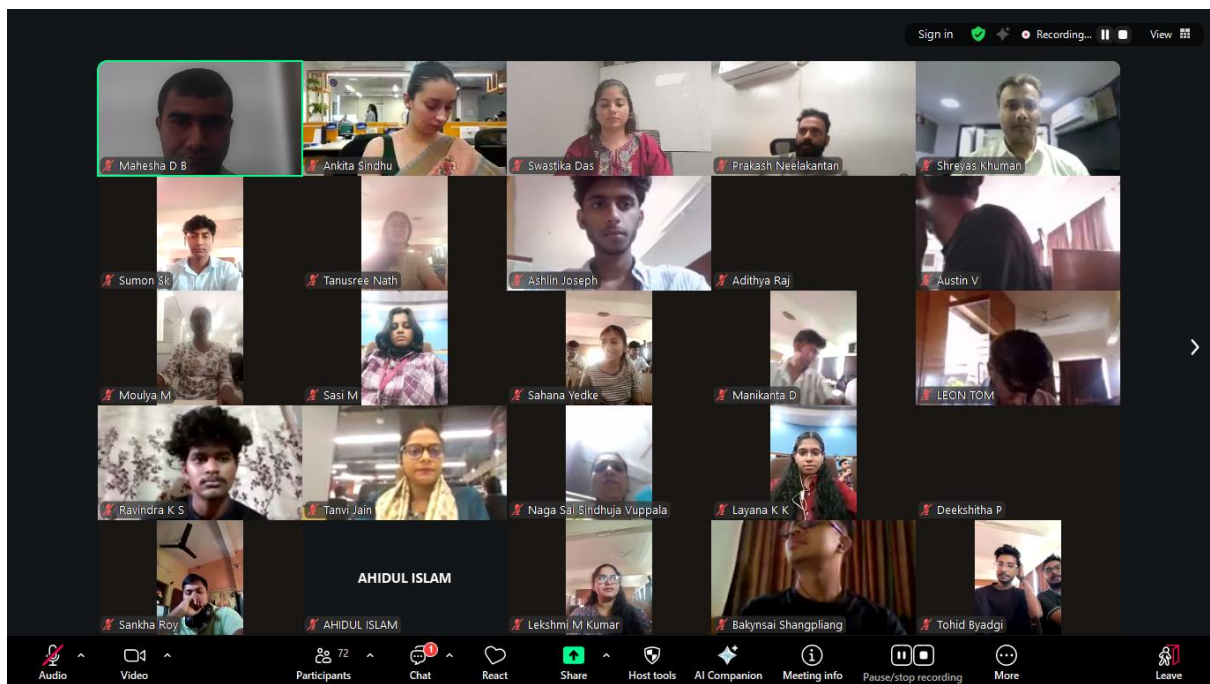

Participants expressed interest in future sessions on **Mobile GIS, AI/ML in GIS, Digital Twins, Enterprise Geodatabases, weather analytics, and advanced GeoAI workflows**. Some requested more live demonstrations and hands-on content. Overall comments were overwhelmingly positive, emphasizing the usefulness and clarity of the sessions.

Webinar Attendees

The webinar successfully met its objectives, offering valuable insights into emerging geospatial technologies. With increased participation and consistently excellent ratings across all categories, the event proved to be a significant contribution to geospatial learning and professional development. Both sessions—Geo-AI and Web GIS—were highly appreciated for their clarity, relevance, and practical value. Participants expressed strong interest in future sessions with more advanced topics and hands-on demonstrations.

The organisers conveyed their sincere thanks to the speakers, all participants, and the University authorities for their support in making the event a success.

Participants Feedback

4. How would you rate the overall webinar experience?

5. How satisfied were you with the organization and flow of the event?

6. Was the webinar duration appropriate?

Session 1 – Geo-AI & Applications 7. How clearly were the Geo-AI concepts explained?

47 responses

8. How relevant were the examples/applications discussed?

47 responses

Session 2 – ArcGIS for Web-Enabled GIS 10. How well were the fundamentals of Web GIS explained?

47 responses

11. How useful was the session for your academic/professional needs?

47 responses
