

JSS Dental College equipped me with the basic of what it takes to be a dentist. I feel thankful that we have a lot of cases in JSS to learn from. And as a dentist, I learned that our hands-on training on patients is as important as the knowledge. However, dentistry is a vast field and ever evolving. So one has to keep going to the latest courses and conferences in order to stay updated to the latest techniques.

From,

Dr Tan Yi You
